How to search for books in MULibrary Search

When searching in MULibrary Search you will have the best experience if you log in first. As a member of the WRLC you can borrow books from MU and the schools listed on the screen. To get started all you have to do is enter the title or keyword of the book you are looking for and click search. On left hand side use the ‘Refine your results’ options: you will need to choose resource type and filter to include only books. Now to borrow a book click on the title to open the full record. If it is a book owned my MU you can just note the call number and retrieve it from the library. If it’s owned by one of our partner Universities or if the MU book is unavailable all you have to do is click on the ‘Request Materials’ option and complete the form.

Note what library you would like to pick the book up from and click submit. You will receive an email from the library when your book is ready for pick up. If you wanted to only see books owned by MU you can do so by using the using the Institution filter or you could have directed your initial search to only search the ‘MU Catalog’. Either way is fine!

Remember should you need us librarians are available via chat, email, and phone or in person at the reference desk to help with all your research needs.
